PDF | This article looks at a particular type of routine formula, called 'second-level discourse marker' (SLDM), which falls within the scope of what is sometimes termed 'procedural vocabulary'.

## **(PDF) Second-level discourse markers across languages**

A discourse marker is a particle (such as oh, like, and you know) that is used to direct or redirect the flow of conversation without adding any significant paraphrasable meaning to the discourse. Also called a pragmatic marker. In most cases, discourse markers are syntactically independent: that is, removing a marker from a

sentence still leaves the sentence structure intact.
